PROJECTS

AI Resume Analyzer and Job Match System | *Python, Tkinter*

[GitHub Repository](#)

- Developed an AI-powered Resume Analyzer and Job Match System using Python and Tkinter.
- Users input their name, email, and skills, then select a target job role.
- The system compares user skills against the required skills for the role and displays matched skills, missing skills, and an overall match percentage.
- Provides personalized recommendations on which skills to improve to better fit the selected job role.

FileSense – Intelligent File Organization & Duplicate Detection Tool | *HTML, CSS, JavaScript*

[GitHub Repository](#)

- Developed a responsive file-management dashboard using HTML, CSS, and JavaScript.
- Implemented file selection, file categorization, search, filtering, and duplicate-file detection features.
- Designed Login and Registration interfaces with client-side form validation.
- Created an interactive dashboard to display file statistics and category-wise information.
